

Request #26525

ssl keys

open boxee
Mar-28 03:20 am

Greetings,

Would you please provide me with the private keys and scripts necessary to construct an ISO file that will successfully install on the Boxee Box.

Thank you.

Hi

Please go to <http://www.boxee.tv/download> and download the source code . What ISO file are you looking for? If you are looking for a way to be able to telnet the Box this will not be possible .

Regards

Marcel

Hi Marcel,

Thanks for you attention on this matter. I have not found what I need in the source code files. I need the Openssl private keys necessary to generate the files run-time.sig and the other *.sign files, found in the boxee.iso firmware files. I expect that I would require two different keys, one 2 Mbit and one 1 Mbit. I would also like the scripts that are used to control the creation of the signatures. If there are other files required to generate these signatures, please let me know.

Kind regards.

Hi Marcel,

Thanks again for your time on this. I disagree, however, with your conclusion.

Please elevate this request to a level of seniority sufficient to insulate yourself from culpability and then answer the question again.

Thanks.

Kind regards.

Hi Boxee,

Please respond.

Thanks

Hi Marcel,

I need Boxee "to provide [me] with whatever information or data is necessary to install modified software on the device. This may be as simple as a set of instructions, or it may include special data

open boxee
boxee

such as cryptographic keys or information about how to bypass an integrity check in the hardware" as per the GPL that applies to the device.

I need to be able to produce all files required for a successful installation of custom software on the Boxee Box.

Thanks.
